Profile

I am a dedicated full-stack developer with knowledge of both back-end and front-end technologies. Over the past two years, I have honed my skills as a full-stack developer and have experience in creating innovative, efficient, and secure web applications. I possess extensive expertise in Nest.Js, Express.Js, Node Js, nextJs, React, MongoDB, JavaScript, TypeScript, and other essential web technologies. You can explore some of my projects on my GitHub profile or my portfolio website. I have successfully developed and deployed diverse projects spanning various domains. Am currently working as a full-stack developer at KTS(kegeberew technology solution) which is sister company of Purpose Black Eth also working freelancer on several application par-time.
